FT5007 – FinTech Capstone Project Assessment (For Internal Project only)

Last edited by jinxing on May 13, 2026, 4:44 pm

Note: This is for students who are enrolled in FT5007 and unable to secure an external internship. They will be given an internal project during the five-month period (mid-May to mid-October).

Expectations of Student

Students must agree on a well-defined schedule with the academic advisor, and to ensure that the requirements of the course are completed over the five months with completed deliverables. The student may work with the academic advisor to come up with a schedule that suits both parties. Students are not allowed to take up any other internship during the period they are engaged in FT5007 which should strictly be completed in Singapore.

- Guideline for Academic Advisor

Set Up Scope/Methodology of the Project

Students will work under the supervision of his or her academic advisor. The intent is to pick up the basic skills (e.g., tools, techniques, literature) required to successfully complete the project. Students should clearly define a problem and come up with a list of objectives that they wish to target for the successful completion of the project.

Units

The course FT5007 is a 12 Units Letter-Graded course, and the workload will be distributed over Semester 1.

Deliverables / Submission Deadlines

During the four-month internship, students are required to submit the following reports which will be part of the evaluation requirement:

- Monthly Logs
- Two Interim Reports (By 30 June and 31 August)
- Two Interim Oral Presentations
- Final Report (Instructional Week 11)
- Presentation (Instructional Week 12)
- Submission of evaluators' assessment reports (By mid-November latest)

Graduating students are expected to be conferred in January of the following year. Please note that the period of conferment is indicative and may be subject to delays in various submission/evaluation processes.

Monthly logs

Each month (starting from June), submit a Monthly Log based on the template here. Include what was achieved for the month, upcoming plans for the following month, and any current challenges. Students should update their Sprint and Product Backlogs, and refine user stories as needed. Students should explain how they plan to overcome challenges, whether they need support (from clients or staff), and what outcomes they expect to achieve.

Interim Report Submission (Progress Report)

Students will need to complete two *Interim Reports* on their progress by 30 June and 31 August respectively via the MComp General Track/Digital FinTech – Capstone Project Management System. The *Interim Reports* contain a series of questions which comprise of the scope and objectives of the project. This includes (but not limited to) the scope and methodology of the project. The *Interim Reports* may be used for evaluation but the grade will be awarded upon the completion of the project.

Note: A satisfactory pass must be attained. Failure to do so may result in a F grade.

Final Report

Students will be required to submit a *Final Report* via the MComp General Track/Digital FinTech – Capstone Project Management System. Page Limit: 25-50 pg (body of document, *including* front/Appendix). Submissions may be made in PDF or Word format. Students may make appropriate modifications depending on the nature of their work.

The final report should provide a clear overview of the project, starting with an executive summary. It must include both analytic and functional requirements, supported by user stories. The report should describe the system design, user interface, and platform choices, and justify the selected methods, models, and performance indicators with reference to relevant literature. Include practical use cases to demonstrate how the system functions, along with coded sprint demos

as evidence of progress. If applicable, offer recommendations based on the findings. Finally, conclude with a summary of the overall results and project outcomes.

Students should also upload a copy into Dspace (instructions here) after the evaluation is completed.

3 Oral Presentations

Upon submission of the *First Interim Report*, the candidate is required to provide an oral presentation to his or her academic advisor. The mode can be either physical or online (with cameras turned on at all times).

Upon submission of the *Second Interim Report*, the candidate is required to provide an oral presentation to his or her academic advisor. The mode should be physically in School.

Upon submission of the *Final Report*, as part of the project assessment and examination, the candidate is required to provide a formal **20 to 30-minute** oral presentation to his or her evaluators comprising of their academic advisor and an assigned examiner. The mode should be physically in School.

All presentations should comprise of a 20-min sprint demo presentation and 5-min Q&A session. For the assessment, the student needs to define a clear and specific problem that can be solved using analytics, and explain why it matters in a real business context. Describe the stakeholders involved (e.g., decision-makers, users), what constraints exist, and how the work supports business goals. Outline the approach—what method the student will be using, why it fits, and what data and tools are required. Then, explain both the functional goals (what the solution should do) and the analytical needs (what models or analysis are required). Finally, state what outcome the student expects to deliver and how it will help solve the problem. The dress code should be in business formal attire. Students are required to make their own arrangements with their evaluators for their presentation

NUS Intellectual Property Policy

In accordance with NUS IP policy, unless otherwise expressly specified, all rights, title and interest in intellectual property discovered, created or developed in the course or furtherance of University research shall vest in and belong to NUS.

If the research is conducted in association with a third party, the terms of the third party contract shall override the terms of the IP policy terms which are to the contrary.

Assessment Criteria for FT5007

	Weightage
Career Accelerator	10%
Capstone Seminar	10%
Capstone Project (Further breakdown below)	80%

Students who embark on the FinTech Capstone projects are evaluated based on the following:

	Academic Advisor (40%)	**Examiner (40%)**
Interim Report	5%	–
Monthly Logs	5%	–
Final Report and Presentation	20%	40%
Professional Conduct	5%	–
Interim and Final Lesson Learnt	5%	–

Rubrics for each component

Category	**Interim Reports & Presentations**	**Monthly Logs**	**Final Report & Presentation**	**Professional Conduct**	**Interim & Final Lessons Learnt**
Excellent	Clear goals, convincing problem statement, well-defined deliverables, good problem-	All/almost all logs submitted; detailed, thoughtful reflections	Comprehensive, well-analysed report; innovative and transformative solutions that exceed	Highly proactive; consistently acts on feedback, demonstrates excellent work	Deep, well-articulated insights showing growth, critical reflection, and

	solving, innovative, strong and structured presentation.	and action plans.	expectations, confident, clear presentation with solid conclusions.	ethic and initiative.	learning from challenges.
Satisfactory	Most aspects covered with reasonable clarity; convincing problem statement, some details missing; overall good delivery.	Most logs submitted; generally relevant reflections with some superficial points.	Covers key areas; reasonable analysis with minor issues in clarity or depth, meets customer expectations.	Generally responsible; follows feedback and completes tasks, but shows limited initiative beyond expectations.	Some reflection present; acknowledges learning but lacks depth or specificity.
Unsatisfactory	Limited detail or clarity; weak explanation of progress; poorly organised presentation.	Few logs submitted; brief or shallow responses with limited engagement.	Incomplete or unclear; lacks analysis or depth in both report and presentation.	Inconsistent effort; limited responsiveness to feedback; minimal initiative.	Minimal reflection; insights are vague or unsubstantiated.
Poor	Missing key components; lacks clarity and effort; poor or ineffective communication.	Few or no logs; reflections are missing or irrelevant.	Major components missing; little understanding demonstrated.	Poor attitude; lacks responsibility, engagement, and professionalism.	No meaningful reflection; no evidence of learning or growth.
